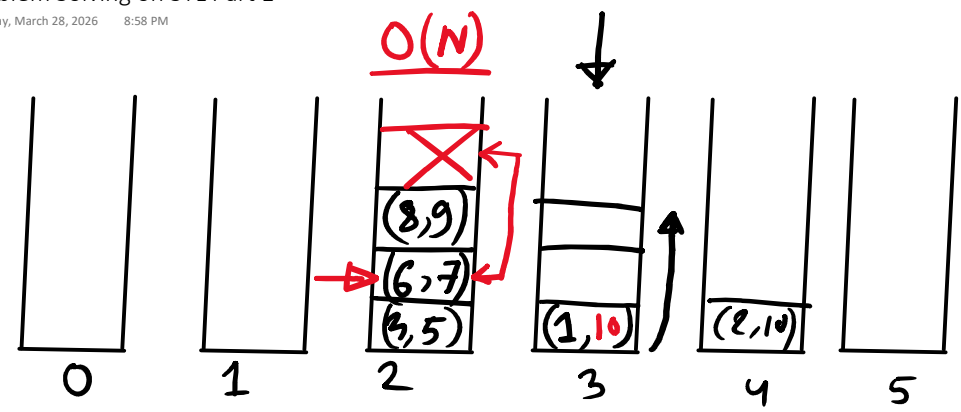
Problem Solving on STL Part 1

Saturday, March 28, 2026 8:58 PM



(put(1, 5))

→ hash(1) = h1

→ h1 % 5 = 3

put(1,10)

replace, swap

remove(6)

pop_back

O(1)

5+1

VI → 6

IV → 4

(-1)

10+1

XI → 11

IX → 9

10-1

(-1)

-1 -5

I V L

50 → 44

α β

α < β

−

α > β

+

1. count is even ✓

2. even ✓

3. "— — — —" → valid" ✓

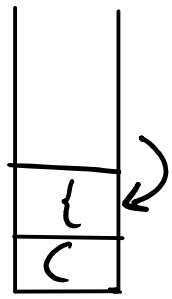
3. _ _ _ _ → valid

({ }) [ ]

Stack

① Process the full String

② Stack will be empty



(([ ))

(( )))

({) }

[( )] {
